

UBC TALKS Webinar

Future trends in sustainable energy production

30 November 2021

09.30–11.00 CET (10.30–12.00 EET)

Many UBC Member Cities aim to reach carbon neutrality goals in the energy-related targets in the coming decade, but to achieve that, reducing the consumption of fossil-based energy is needed. Using energy more efficiently is one of the direct and cost-effective ways to save money, reduce greenhouse gas emissions, create jobs, and meet a growing energy demand. How to reach and promote energy efficiency, and what will be the trends in the sustainable energy production for 2022-2030?

Programme

Moderator: Mariia Andreeva, UBC Sustainable Cities Commission

- | | |
|------------------------|--|
| 09.30–09.35 CET | Welcome to the webinar |
| 09.35–09.50 | From climate neutral to climate positive – Växjö Energi has solutions to stop the climate crisis
<i>Erik Tellgren, vice-president of Växjö Energy AB</i> |
| 09.50–10.05 | Sustainable energy production in the city of Valmiera
<i>Māris Kānītis, Member of the Board of Adven Latvia company</i> |
| 10.05–10.20 | Energy efficiency plans from the city of Turku
<i>Sini Lamoureux, City of Turku, RESPONSE project</i> |
| 10.20–10.30 | Energy trends and policies influencing the cities of tomorrow
<i>Floriane Cappelletti, Energy Cities</i> |
| 10.30–10.35 | 3rd call for the European City Facility applications
<i>Sini Lamoureux, UBC Sustainable Cities Commission</i> |
| 10.35–10.55 | Panel discussion |
| 10.55–11.00 | Closing words |
