Many UBC cities are international forerunners in working with the UN 2030 Agenda and reviewing the progress of localising Sustainable Development Goals through a Voluntary Local Review process. UBC encourages more of its member cities to join the global movement! The UBC TALKS in November 2022 provides support in this process, sharing methods and tools for benefiting from localising SDGs and exploring internal processes through VLR reports.

**Moderator:** *Agnieszka Ilola, UBC Sustainable Cities Commission*
