Future campaigns

- photo exhibition in spring 2020
- OSPAR monitoring: specify the problem of marine litter in Rostock
- Idea: start official project (EU-funding? Support of the city of Rostock?)
- frame and place political demands in our city
 - ban on private fireworks (at least at shoreline/beaches/riverbanks)
 - compulsory use of reusable cups and plates at outdoor events
 - ...

photo exhibition

Mobilizing a growing number of organisations and people → achieve change!

Criticism

Potential

Criticism

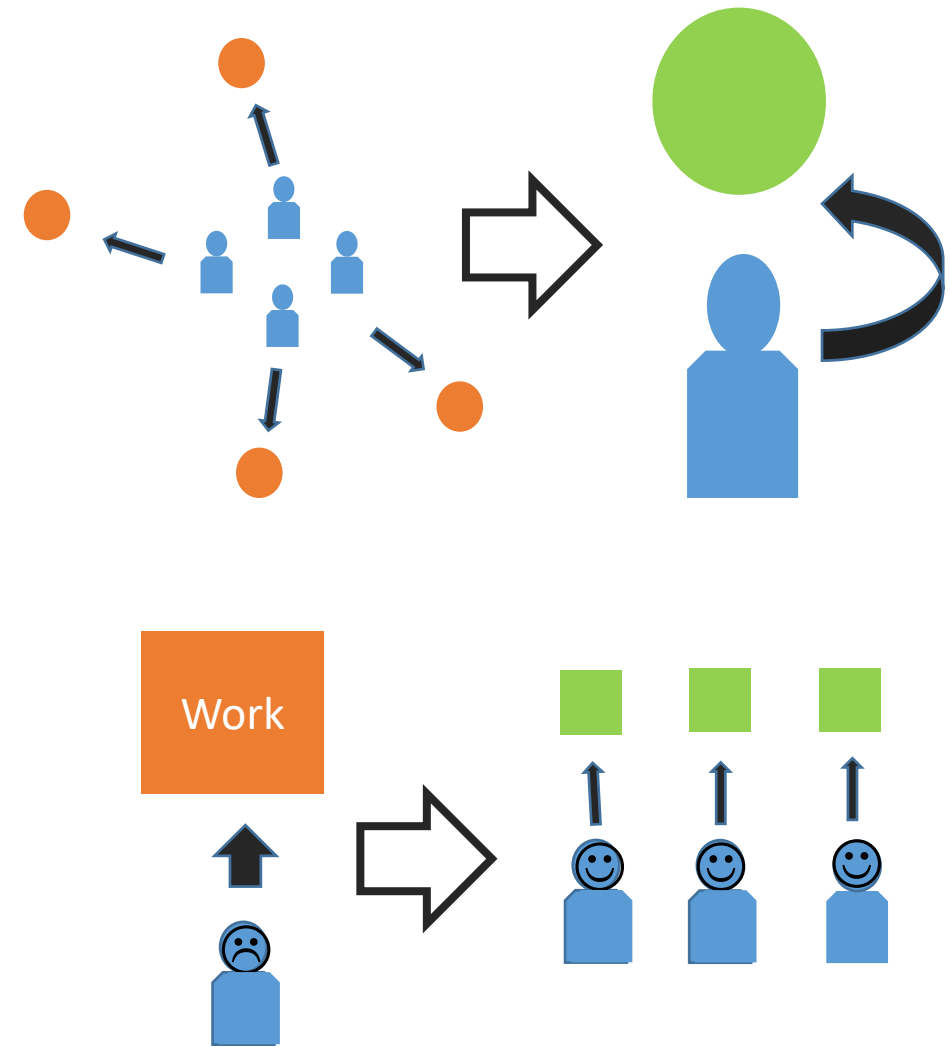

- sometimes division of tasks and workload unclear
- snowball principle unpredictable
- currently no funding
- not one fix person in charge / everyone is in charge (pro and con)
- placing political demands more difficult
- ...

Summary	Prev. campaigns	Cur. campaign	Fut. campaigns	Criticism	Potential
---------	-----------------	---------------	----------------	-----------	-----------

Potential

- Larger range when all groups of the round-table advertise the same project
- More power for submitting political demands

- Each party contributes according to their knowledge/experiences and possibilities
- Division of work saves time

The cooperation of different stakeholders enables the group to achieve more than a single organisation/individual!
