EnTRA Workshop – Technical solutions on transferability of EU-project results

13th November 2026, 09.00 -10.30 am CET| 10.00-11.30 EET

Projects funded by the European Union deliver a valuable asset for energy transition related topics. Those results are often not used in the frequency that is expected.

How can we improve visibility of Energy Transition Project Results?

The **EnTRA** project focuses on the key barriers and potentials of the uptake of project results and will deliver a contribution to the energy transition by making project results more visible, tailored to the needs of users from local or regional authorities and sectoral agencies.

In this Workshop we want to present you the **EnTRA** project and its goals, discuss technical barriers and elaborate potentials and further needs for a successful legacy of **Energy Transition Project Results**.

Present:

Jan Gerbitz ZEBAU GmbH, Jan Friedrich ZEBAU GmbH, Dace Lauka RTU

Agenda

1) **What is EnTRA? Introduction to the project and its goals**
2) **Best Practice: How existing projects keep a positive legacy**
3) **Discussion – How can we make project results more visible**
4) **Closing Session**

13th November 2026, 09.00-10.30 am CET| 10.00-11.30 EET
